

SAJ-160-S1-GRP

Trihedral Corner Reflector, 16"

SAJ-160-S1-GRP is a 16" x 16" x 16" trihedral corner reflector, featuring a rugged aluminum construction with a gold chemical film finish. The trihedral reflector simulates radar target precisely and is widely used for Radar system calibration. With a ¼-20 threaded hole for a built-in mounting bracket, the reflector can be mounted onto a tripod for rapid system setup.

Mechanical Specifications:

Item	Specification
Mounting	¼-20 Threaded Hole
Material	Aluminum
Finish	Gold Chem Film
Weight	7.0 lbs
Edge Length	16.0"
Outline	AJ-S-16.0-GRP

ECCN
EAR99

- FEATURES
- Compact Size
 - High RCS
 - Rugged Configuration

- APPLICATIONS
- Radar Target Simulator
 - Radar System Evaluation
 - Radar System Calibration

SUPPLEMENTAL DETAILS

SAJ-160-S1-GRP

Calculated Radar Cross Section and Relative Magnitude

Mechanical Outline: Unless otherwise specified, all dimensions are in inches [millimeters]

NOTE:

- On condition that simulated test data is provided, actual measured data may slightly vary.
- Eravant reserves the right to change the information presented without notice.
- For more information on corner reflectors, an informative blog is provided here:

**WARNING****SHARP METAL EDGES - SEVERE INJURY RISK**

- Handle with extreme caution. Sharp and pointed metal edges can cause severe cuts, punctures, or bodily injury.
- Wear heavy-duty gloves and appropriate protective equipment during handling, assembly, and installation.
- Use care to prevent slips, falls, or accidental contact with the product.
- Do not leave unattended in areas accessible to children or unauthorized personnel.
- Ensure product is securely stored or mounted to minimize risk of accidents.
- Failure to follow these warnings could result in serious injury.
- Eravant assumes no responsibility for injuries resulting from improper handling, installation, or storage of this product.
