

SAJ-400-S1

Trihedral Corner Reflector, 40"

SAJ-400-S1 is a 40" x 40" x 40" trihedral corner reflector, featuring a rugged aluminum construction with a clear chemical film finish. The trihedral reflector simulates radar target precisely and is widely used for Radar system calibration. With 4x 1-8 UNC threaded mounting holes for a built in mounting bracket, the reflector can be mounted for rapid system setups.

Mechanical Specifications:

Item	Specification
Mounting	4 x 1-8 UNC Threaded Holes
Material	Aluminum
Finish	Clear Chem Film
Weight	44.6 lbs
Edge Length	40"
Outline	AJ-S-40.0-RC

ECCN

EAR99

FEATURES

- High RCS
- Setup with Ease
- Rugged Configuration

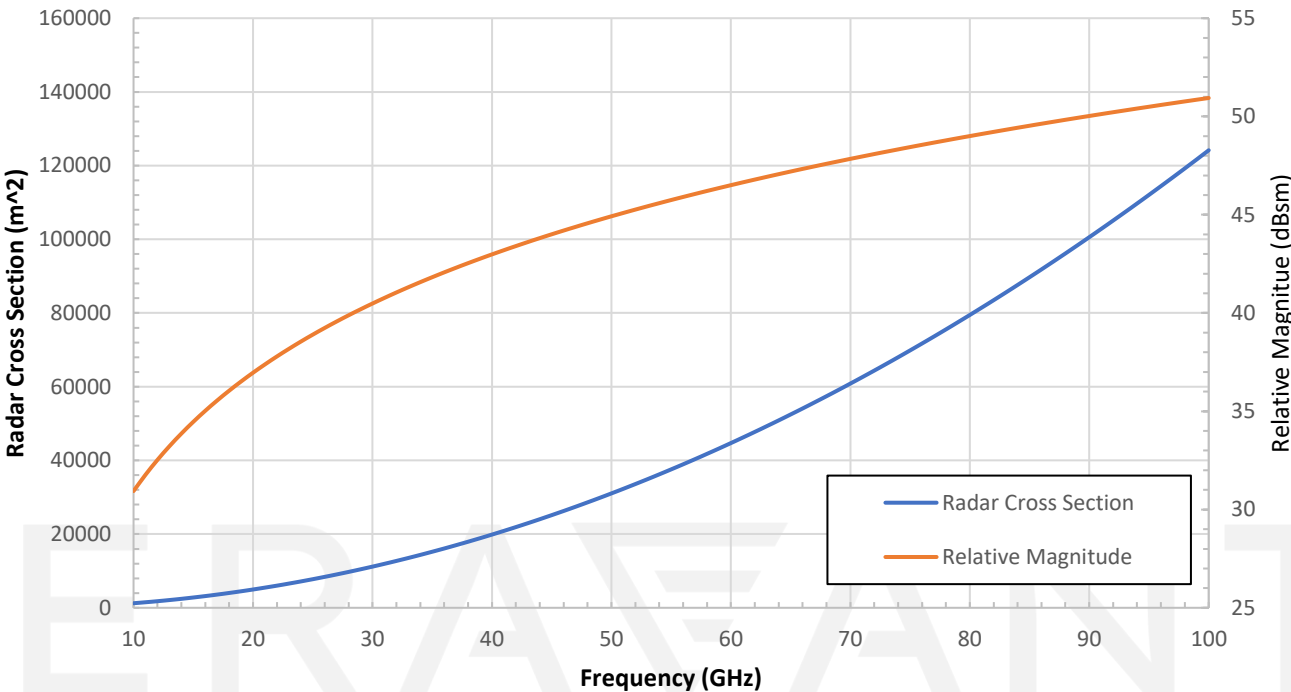

APPLICATIONS

- Radar Target Simulator
- Radar System Evaluation
- Radar System Calibration

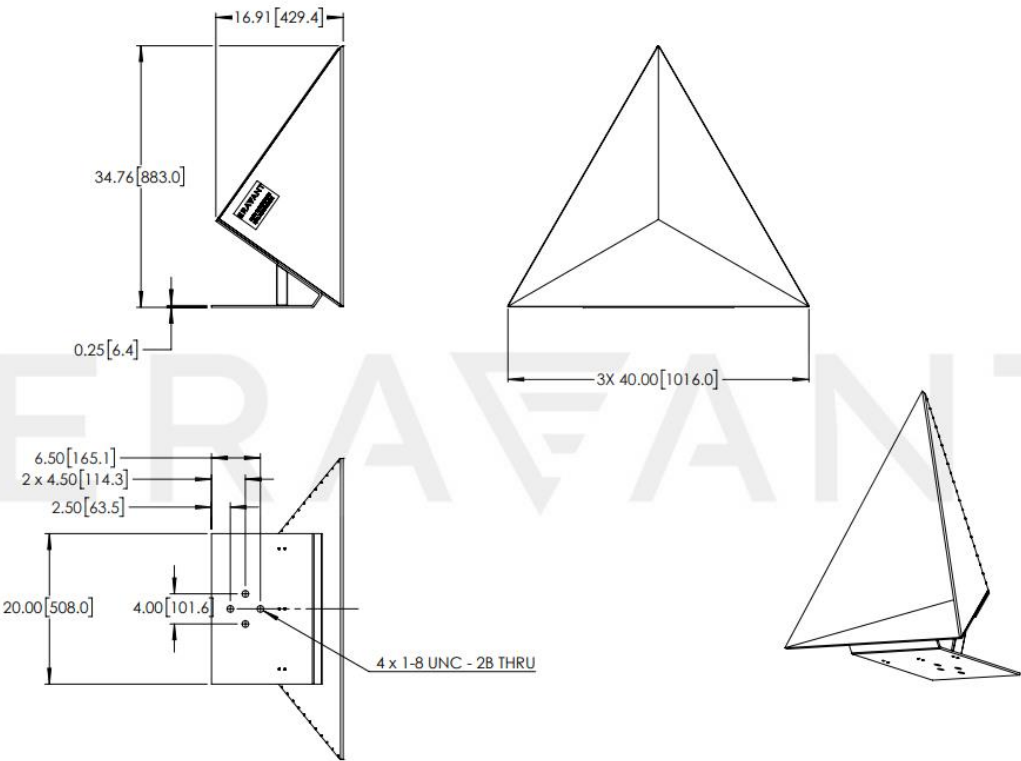

SUPPLEMENTAL DETAILS

Calculated Radar Cross Section and Relative Magnitude

Mechanical Outline: Unless otherwise specified, all dimensions are in inches [millimeters]

NOTE:

- On condition that simulated test data is provided, actual measured data may slightly vary.
- Eravant reserves the right to change the information presented without notice.
- For more information on corner reflectors, an informative blog is provided here:

**WARNING****SHARP METAL EDGES - SEVERE INJURY RISK**

- Handle with extreme caution. Sharp and pointed metal edges can cause severe cuts, punctures, or bodily injury.
- Wear heavy-duty gloves and appropriate protective equipment during handling, assembly, and installation.
- Use care to prevent slips, falls, or accidental contact with the product.
- Do not leave unattended in areas accessible to children or unauthorized personnel.
- Ensure product is securely stored or mounted to minimize risk of accidents.
- Failure to follow these warnings could result in serious injury.
- Eravant assumes no responsibility for injuries resulting from improper handling, installation, or storage of this product.
