

## K Band Microstrip Patch Array Antenna, 12° x 12°

### Description:

**Model SAM-2432432212-KF-L1** is a linear polarized, 24 GHz microstrip patch array antenna. The antenna implements a series-fed power distribution to achieve low sidelobe levels. The antenna has a gain of 22 dBi and a beamwidth of 12 degrees both vertically and horizontally, with a better than -20 dB sidelobe suppression level. The antenna is constructed with a high performing, low loss soft microwave substrate to achieve the best performance in the class. The RF interface is a female 2.92 mm connector. A standard WR-42 waveguide version with a UG-595/U flange is offered under model number SAM-2432432212-42-L1.
