

Ka Band Microstrip Patch Array Antenna, 15.0° x 4.8°

Description:

Model SAM-3533532005-KF-L1 is a linear polarized, 35 GHz microstrip patch array antenna. The antenna implements a series-fed power distribution to achieve low side lobe levels. The antenna has a gain of 20 dBi and a beamwidth of 15 degrees vertically and 4.8 degrees horizontally, with a better than 18 dB side lobe suppression level. The antenna is constructed with a high performing, low loss soft microwave substrate to achieve the best performance in the class. The RF interface is a female 2.92 mm connector. A standard WR-28 waveguide version with a UG-599/U flange is offered under model number SAM-3533531905-28-L1.

Features:

- Compact Size and Center Fed
- Low Side Lobes
- Low Cost in Volume

Applications:

- Radar Systems
- Communication Systems
- Sensor Heads
