

## Ka-Band Power Amplifier, 38 to 40 GHz, 40 dB Gain, +32 dBm P<sub>1dB</sub>

### Description:

**Model SBP-3834034032-2828-E1-HR** is a power amplifier with a typical small signal gain of 40 dB and a nominal P<sub>1dB</sub> of +32 dBm across the frequency range of 38 to 40 GHz. The DC power requirement for the amplifier is +8 V<sub>DC</sub>/2.4 A at quiescent and +8 V<sub>DC</sub>/4.0 A under RF drive. The RF connectors are WR-28 Uni-Guide™ waveguides. Other port configurations, such as K connectors, are also available under different model numbers.

**Mechanical Outline:** (Unless otherwise specified, all dimensions are in inches [millimeters])

**Note:**

- All data presented is collected from a sample lot. Actual data may vary unit to unit.
- All testing was performed under +25 °C case temperature.
- The amplifier employs SAGE Millimeter’s trademarked and patent pending technology, **Uni-Guide™**, as its waveguide interfaces. The orientation of the input and the output waveguides can be specified through corresponding model numbers. For example, the model number for a horizontal output waveguide configuration would be **SBP-3834034032-2828H-E1-HR** instead of the default **SBP-3834034032-2828-E1-HR** which indicates vertical orientation output.
- Other mechanical configurations are available under different model numbers.
- SAGE Millimeter, Inc. reserves the right to change the information presented without notice.

**Caution:**

- Exceeding absolute maximum ratings shown will damage the device.
- The device is static sensitive. Always follow ESD rules when working with the device.

## Ka-Band Power Amplifier, 38 to 40 GHz, 40 dB Gain, +32 dBm P<sub>1dB</sub>

- The case temperature of the device shall never exceed +50 °C. Use proper heatsink or fan if necessary.
- Any foreign objects in the waveguide will cause performance degradation and may damage the device.
