

SMA Coaxial Fixed Attenuator, 10 dB Attenuation

SCA-10-SMSF-SD is a 10 dB coaxial attenuator that is used in millimeterwave systems and operates from DC to 26.5 GHz. The attenuator has a typical attenuation value of 10 dB across the frequency range. While the attenuator is designed and fabricated for full SMA coaxial band applications, the attenuation value of this model will have a wide range due to its broadband coverage. Various attenuation values are available under different model numbers.
