

X4 Active Frequency Multiplier, Ka Band, 24 to 42 GHz, +16 dBm P_{out}

Description:

Model SFA-243423416-28SF-E1 is an active X4 frequency multiplier. The multiplier has an input frequency of 6 to 10.5 GHz with a typical input power of +5 dBm and an output frequency of 24 to 42 GHz with a typical output power of +16 dBm. The multiplier also has a typical harmonic suppression of -15 dBc. The DC power requirement for the multiplier is +8 V_{DC}/300 mA. The input port of this model is a female SMA connector and the output port is a WR-28 Uni-Guide™ waveguide with a UG-599/U flange. It is an in-line angle configuration. Other port configurations, such as right angle, are also available under different model numbers.

Features:

- Wide Band Coverage

Note:

- All data presented is collected from a sample lot. Actual data may vary unit to unit, slightly.
- All testing was performed under +25 °C case temperature.
- The active multiplier employs Eravant's trademarked and patent pending technology, **Uni-Guide™**, as its output waveguide interface. The orientation of the output waveguides can be specified through corresponding model numbers. For example, the model number for a horizontal output waveguide configuration would be **SFA-243423416-28HSF-E1** instead of the default **SFA-243423416-28SF-E1** which indicates vertical orientation output.
- Eravant reserves the right to change the information presented without notice.
- Other mechanical configurations are available under different model numbers.

Caution:

- Exceeding absolute maximum ratings shown will damage the device.
- The device is static sensitive. Always follow ESD rules when working with the device.
- The case temperature of the device shall never exceed +50 °C. Use proper heatsink or fan if necessary.
- Any foreign objects in the waveguide will cause performance degradation and may damage the device.
- Proper torque, 8.0 ± 0.15 inch-pounds (0.90 ± 0.02 Nm), should be applied. **Eravant torque wrench, model SCH-08008-S1, is highly recommended.**
