SFD-144224-05SF-P1

G-Band Amplitude Detector, Small Signal, Positive

Description:

Model SFD-144224-05SF-P1 is a G Band amplitude detector that can be used for full or narrow band applications. The detector is zero biased and intended for small signal detection purposes. With a distinct circuitry design and careful diode selection, the detector exhibits high sensitivity and extremely flat output characteristics across the full waveguide operating bandwidth. The detector is designed to have a 10 MHz video bandwidth and a 1 M Ω video output impedance. The minimum detectable signal level is approximately -45 dBm.

Features:

- Full Waveguide Band Operation
- High Sensitivity Without Tuning
- High Sensitivity Stability Over Broad Temperature Range

Applications:

- Radar Systems
- Communication Systems
- Test instrumentations
