

# E Band Waveguide Junction Circulator, 74 to 76 GHz

## **Description:**

Model SNW-7437630814-12-C1-WP is an E band waveguide junction circulator that covers the frequency range of 74 to 76 GHz. The circulator is a key component in any radar and communication system where the duplexing functions are required. The waveguide junction circulator is manufactured to offer the highest performance. The circulator is designed and manufactured to provide a low insertion loss of 0.8 dB and an isolation of 14 dB typically, which offers the broadest bandwidth in the class. The compact dimension guarantees the compact system integration. The RF ports are WR-12 waveguides with UG-387/U flanges.

#### **Features:**
