

35.00 GHz Doppler Sensor Head, Single Channel, Long Range

Description:

Model SSS-35320-22L-S1 is Ka Band, lens antenna-based Doppler sensor head that is designed and manufactured for **long range** measurements of a moving target's speed. The sensor head has a center frequency of 35 GHz and takes a nominal bias of +5.0 VDC/650 mA. The sensor heads are configured with a lens corrected antenna, T/R diplexer, a single channel receiver and a transmitter/receiver oscillator in an integrated package. Sensor heads with a dual receiver are offered under model number **SSS-35320-22L-D1** and can detect both the speed and direction of a moving target.
