

# U-Band Fixed Attenuator, 30 dB

### **Description:**

Model STA-30-19-F2 is a 30 dB fixed attenuator that is used in millimeterwave systems and operates from 40 to 60 GHz. The attenuator has a fixed attenuation value of 30 dB at center frequency, 50 GHz. While the attenuator is designed and fabricated for full waveguide band applications, the attenuation value of this model does show a minor slope within the band due to its distinct mechanical configuration. Various attenuation values are available under different model numbers.
