

STA-30-42-F1

K-Band Fixed Attenuator, High Precision, 30 dB

STA-30-42-F1 is a 30 dB fixed attenuator that is used in millimeterwave systems and operates from 18 to 26.5 GHz. The attenuator has a fixed attenuation value of 30 dB at center frequency, 22.25 GHz. The attenuator's waveguides are manufactured with precision wire EDM to ensure high accuracy and a quality internal surface finish. The design features a sandblasted surface treatment to provide a durable finish. While the attenuator is designed for full waveguide band applications, the attenuation value does show a minor slope within the band due to its distinct mechanical configuration. Other attenuation values are available under different model numbers as **STA-XX-42-F1**, where **XX** is the desired attenuation value.
