

STC-20-19-S1

U-Band Full Waveguide Band Down-Converter

STC-20-19-S1 is a U-Band down-converter that converts millimeterwave signals from a frequency range of 40 to 60 GHz to the baseband at 10 MHz to 1.6 GHz. The down-converter requires 10 to 15 GHz at +3 dBm input power, which can be obtained from a standard 20 GHz synthesizer, such as **Eravant models STL-SG-022203-S1** or **SOT-02220313200-SF-B6**. The down-converter has low harmonic levels and excellent gain flatness, making it a good candidate to extend low frequency test equipment for millimeterwave testing purposes.

NOTE:

- On condition that test data is provided it is collected from a sample lot. Actual data may vary slightly from unit to unit. All testing is performed under +25 °C room temperature.
- Eravant reserves the right to change the information presented without notice.

CAUTION:

- Exceeding absolute maximum ratings of the device will damage the device.
- If a waveguide is present, any foreign objects in the waveguide will cause performance degradation and may damage or destroy the unit.
- For 1.35 mm, 1.85 mm, 2.4 mm, 2.92 mm, and SMA connectors proper torque should be applied: 8.0 ± 0.15 inch-pounds (0.90 ± 0.02 Nm). Torque wrench model **SCH-08008-S1** is highly recommended.
