### D-Band X6 High Power Frequency Extender

**STE-KF606-10-S1** is a D-Band X6 frequency extender that uses an input signal from 22.5 to 26.666 GHz at +5 dBm, along with filtering to produce a 135 to 160 GHz RF signal at +10 dBm. The extender is designed and manufactured as a bench top unit to extend the low frequency synthesizer or sweeper without losing functionalities and features. The extender also features adjustable legs, which can be removed, to allow for an easy test set up.

**NOTE:**

- On condition that test data is provided it is collected from a sample lot. Actual data may vary slightly from unit to unit. All testing is performed under +25 °C room temperature.
- On condition that simulated test data is provided, actual measured data may slightly vary.
- Other frequency multiplication factors are available under different model numbers.
- Eravant reserves the right to change the information presented without notice.

**CAUTION:**

- Exceeding absolute maximum ratings will damage the device.
- If a waveguide is present, any foreign objects in the waveguide will cause performance degradation and may damage or destroy the unit.
- For 1 mm connectors proper torque should be applied:  $4.0 \pm 0.15$  inch-pounds ( $0.45 \pm 0.02$  Nm). Torque wrench model SCH-06004-S1 is highly recommended.
- For 1.35 mm, 1.85 mm, 2.4 mm, 2.92 mm, and SMA connectors proper torque should be applied:  $8.0 \pm 0.15$  inch-pounds ( $0.90 \pm 0.02$  Nm). Torque wrench model SCH-08008-S1 is highly recommended.
