

E-Band X6 Frequency Extender

Description:

Model STE-SF612-03-S1 is an E-Band X6 frequency extender that uses an input frequency range of 10 to 15 GHz at +5 dBm along with harmonic generation and filtering to produce a 60 to 90 GHz RF signal at +3 dBm. The extender is designed and manufactured as a bench top unit to extend the low frequency synthesizer or sweeper without losing all of the functionalities and features. The extender also features adjustable legs, which can also be removed, to allow for an easy test set up.

Features:

- Full Waveguide Band Operation
- X6 Frequency Extension
- Low Harmonic Emission

Applications:

- Test Lab
- Network Analyzer Systems
- Automatic Test Set
- Antenna Range
