WRD-180 Waveguide to K Connector Adapter, Right Angle

SWC-180KM-R1-WRD is a right angle (90°) WRD-180 double ridged waveguide to coax adapter that cover the frequency range of 18 to 40 GHz. They are designed and manufactured for instrumentation grade quality but offered at a commercial grade price, allowing for an efficient transition between the double ridged waveguide and 2.92 mm (K) coax connector. The end launch (180°) versions are offered under models SWC-180KF-E1-WRD and SWC-180KM-E1-WRD.

Typical Measured Performance vs Frequency

Mechanical Outline: (Unless otherwise specified, all dimensions are in inches [millimeters])

NOTE:

- On condition that test data is provided it is collected from a sample lot. Actual data may vary slightly from unit to unit. All testing is performed under +25 °C room temperature.
- On condition that simulated test data is provided, actual measured data may slightly vary.
- Eravant reserves the right to change the information presented without notice.

CAUTION:

- If a waveguide is present, any foreign objects in the waveguide will cause performance degradation and may damage or destroy the unit.
- For 1.35 mm, 1.85 mm, 2.4 mm, 2.92 mm, and SMA connectors proper torque should be applied: 8.0 ± 0.15 inch-pounds (0.90 ± 0.02 Nm). Torque wrench model SCH-08008-S1 is highly recommended.
