

WR-12 Waveguide Power Divider, 4-Way, Inline, 60 to 90 GHz

Description:

Model SWP-60390304-12-E1-3 is a WR-12, 4-way power divider that operates from 60 to 90 GHz. The power divider offers a typical insertion loss of 1.0 dB and typical isolation of 20 dB. All ports are well-balanced and in-phase for power dividing or combining applications across the band. The power divider is configured as an inline package with WR-12 waveguides and UG-387/U compatible anti-cocking flanges at all ports. The input or output port orientation can be converted from a H-plane to E-plane configuration by installing Eravant's standard compact 90° twist, model **SWB-12090-TB-C**. A right angle, 4-way configuration is offered under model **SWP-60390304-12-S1-3**. Other power splitting options, such as 2-way, 8-way, and 16-way division, are available for both right-angle and inline configurations under different model numbers.

Compact Twist Installation Diagram:

- The diagram below illustrates how to use the compact twist accessory to convert the ports on the power divider from H-plane orientation to E-plane orientation.
- There are two scenarios in which the compact twist can be used as shown below. In both cases, dowel pins cannot be installed on both the power divider and the mating part at the same time.
