Waveguide Crossguide Coupler, E Band, 30 dB

SWX-60390330-12-4B is a four-port, split block crossguide coupler that is offered for power sampling where directivity is of no concern. Compared to a multi-hole directional coupler, crossguide couplers offer lower insertion loss and a smaller form factor and insertion length. This model operates between 60 to 90 GHz with a 30 dB typical coupling level and 0.7 dB nominal insertion. The input, output, and coupled ports are all WR-12 waveguides with UG-387/U anti-cocking flanges.

NOTE:

- On condition that test data is provided it is collected from a sample lot. Actual data may vary slightly from unit to unit. All testing is performed under +25 °C room temperature.
- On condition that simulated test data is provided, actual measured data may slightly vary.
- Eravant reserves the right to change the information presented without notice.

CAUTION:

- If a waveguide is present, any foreign objects in the waveguide will cause performance degradation and may damage or destroy the unit.
